

# VMCC FALL FORUM

## Ports & Terminals

SPEAKERS SCHEDULE

**FRIDAY OCTOBER 29TH**

**9:00 - 11:00HRS PST**

---

**9:00 AM** *General Welcome: Elisabeth Charmley, Executive Director, VMCC*

**9:05 AM** *Christine Rigby, Senior Air Quality and Climate Specialist  
Vancouver Fraser Port Authority*

In partnership with the port authorities of Seattle, Tacoma, and the Northwest Seaport Alliance, the Port of Vancouver established the Northwest Ports Clean Air Strategy to improve air quality and reduce emissions. The strategy outlines a path towards transitioning port activities away from fossil fuels and towards cleaner, lower-emission fuels and technologies.

**9:25 AM** *David Samad, Senior Manager, Maersk Supply Service A/S*

Maersk Supply Service A/S, a part of A.P. Moller-Maersk, and Ørsted have joined forces to test a proto-type buoy that will act as both a safe mooring point and a charging station for vessels, potentially displacing a significant amount of marine fuel with green electricity.

**9:45 AM** *Joel Werner, Director, Engineering & Projects, DP World*

This presentation will discuss DP World's approach to energy management through short to long term outlooks. The focus will be on the journey as we transition towards clean energy sources such as electrification and hydrogen.

**10:05 AM** *Jason Scherr, Manager, Environmental Sustainability, Port of Prince Rupert  
Air and GHG Program*

Overview of the Port of Prince Rupert air emissions and GHG program. Presentation will touch on the current status as well as plans, goals and targets moving forward.

**10:25 AM** *Bill Jackson, Marine and Ports Sector Leader, Canada at Schneider Electric*

Schneider Electric shares it's vision of the port sector and opportunities for decarbonization. Having recently been designated as "The World's Most Sustainable Company" by the Corporate Knights Organization Schneider Electric leverages it's own commitments to sustainability into a successful Sustainability Consulting Practice and leverages best practices for ports by delivering shore power and electrification.

**10:45 AM** *Cory Farquharson, BC Hydro Sr. Key Account Manager - Transportation  
Sector*

As the provincial electrical utility, BC Hydro is a prominent player in supporting electrification for the transportation sector. With the industry's innovative work in decarbonization and BC Hydro's recent electrification plan announcement, we are actively supporting our customers in moving towards our cleaner fuel source.
